# Congratulations

PERSGA Administration and the SEM Project PCU would like to congratulate PERSGA staff and PCU members **Mr. Najm el Dien Awad**, the SEM Project Procurement Specials and **Eng. Islam Taha**, the SEM Project IT and Information Dissemination Specialist for getting their Master Degrees in 2016

**Mr. Najm el Dien** got his Master Degree on Public Procurement Management for Sustainable Development from the University of Turin and the International Training Centre of ILO

The Master's program in Public Procurement Management for Sustainable Development explores the legislative, regulatory, organizational and managerial foundations of modern public procurement. The program is blended learning opportunity that combines the study of policy tools and theory prescriptions with applied assignments and research work. It provides direct access to expertise from academia, international organizations and think tanks, as well as the latest literature and cutting edge research. It encompasses a range of highly developed functions connected with public procurement management and supervision.

**Eng. Islam** got his Master Degree from the Arab Academy of Science and Technology on Developing an Integrated Interactive Web-based GIS System (IIWBGIS) as a Decision Support Tool for Responding to a Marine Crisis in the Red Sea and Gulf of Aden region.

The system developed through the Master program is available online and works by integration of GIS and internet technology. It provides a mechanism to centralize and visually display critical environmental information during a crisis management process. The system spreads and simplifies the exchange of geographical data, providing specific structured information, and enabling users to remotely access critical data during marine crisis.
